

Tracking Miles

- **Mileage rate for 2023: 65.5 cents/mi**
- Keeping track of your own miles conducted through your business can be tedious and irritating but is something that needs to be tracked / logged. While some common ways to keep track of miles is through an excel sheet or on paper it doesn't fit everyone. Here are two apps that can help limit stress and are convenient on the go.
 1. **MileIQ** - Is like tinder but for mile tracking, great for small businesses this app is completely **free** for 40 drives a month. Once exceeded that limit the cost is raised to **\$5.99** each month. This mileage tracker app uses Wi-Fi, GPS and mobile data to track your drives in the background. This allows you to avoid hitting start and stop to track a drive. With just one swipe you can classify your drives as business or personal related.
